

Annual Meeting

The three-day technical meeting of AAPT is held annually in the spring and includes asphalt related technical sessions, symposia, and workshops.

Networking is a key benefit of the annual meeting along with the **technical sessions**. Each technical session includes presentations by experts in the field followed by **open discussions**. The technical sessions are developed by selecting the best of all submitted papers, which are published in the annual journal.

Annual Journal

Since 1928, the AAPT has published an **annual proceedings journal** containing papers and reports presented at the Annual Meeting.

The Journals are unique in that they contain, in addition to formal presentations, the oral and written discussions of papers presented at the technical sessions and symposia.

History

On January 17, 1924, a small group of engineers met in Chicago, Illinois, to establish an association for consideration of the technology of asphalt paving. Since then, the Association of Asphalt Paving Technologists has grown from its original 19 charter members to the present roster of over 700 members from every continent in the world.

“Being an active member of AAPT has granted me the opportunity to network with some of the most talented leaders in our industry.” – Jenna Bowers, Ingevity (member since 2012)

Association of Asphalt Paving Technologists (AAPT)

Leaders in asphalt paving technology since 1928.

Your source for professional development, best practices and the cutting-edge technology in the asphalt paving industry through an annual conference, journals, scholarships, workshops and networking.

Membership

AAPT Mission and Membership Benefits

AAPT is the central point for communicating with your peers and staying up-to-date on the latest developments in the asphalt paving industry.

AAPT is dedicated to

- Supporting and highlighting developments in asphalt paving technology.
- **Facilitating communication** between government agencies, contractors, equipment manufacturers, raw material producers, consulting engineers, and academia.
- Serving as the central point for **exchange of paving technology** innovations.
- Conducting, encouraging and collating **research** in the paving community.
- Fostering **leadership, communication and camaraderie** among paving professionals.

Benefits

- Gain access to a wealth of knowledge, information, professionals and **emerging technologies**, including access to past journals and publications .
- Be an integral part of a **technical community** representing all sectors of the

asphalt industry including private industry representatives, agency and consulting professionals, and researchers.

- Receive the **AAPT Journal** of technical papers, discussion and conference proceedings, including timely information from recently held events.
- **Network** with colleagues from across the globe during annual meetings.
- Participate in **lively debates** on important technical issues related to asphalt paving.
- Belong to an **international** group dedicated to improving asphalt pavements.
- Be a member of an **independent association** without organizational biases; where policies are set by individual members through an elected Board rather than by companies or special interests.
- Support the next generation of technologists through a longstanding student **scholarship program**.
- Be part of a dynamic, growing association that constantly improves to better serve its members and the asphalt community.

"AAPT has been the most important technical association of my career. In addition to being the go-to source for technical information, AAPT has enabled me to connect with knowledgeable engineers and scientists around the world who love asphalt pavements like me". – Randy West, Director of NCAT (member since 1993)

Apply

If you share AAPT's dedication to the advancement of asphalt paving technology and have technical responsibilities requiring access to the latest industry research, please apply for membership today! You may apply and pay the nominal annual membership fee online at: www.asphalttechnology.org

Dues

\$200/year - full and associate member
\$50/year - student
